

Main points of concern

- 1. The relationship between the Plenary, the Liaison sub-Committee and the International Commission needs to be clearly defined.**
- 2. The membership of an International Commission is a factor in our consideration.**
- 3. That a realistic target date be set for the initial report on modalities by the International Commission.**
- 4. That substantive negotiations on the three strands be begun in advance of the International Commission delivering it's initial report.**
