VERBATIM RECORD

1. As promised previously I attach a typed up version of my notes.
2. For all the reasons which have been adduced I do not think we should take any further steps at this stage to prepare a "non-contemporaneous" verbatim record of the 11 September plenary. However, the Secretary of State did revert to the point on Monday so we will need to seek his concurrence. I will try to find an opportunity to do so. Meanwhile I should be grateful if you would ensure that all the source texts are kept readily available.
